TBC Twin
TRANSFORM · BUILD · COMPLY

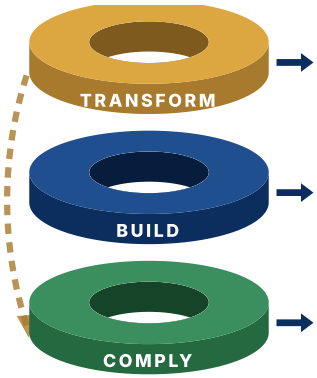

tbctwin.com
Based in Cairo · Egypt · Gulf · Remote

AI with certainty.

TBC no longer means "to be confirmed".
It means **Transform · Build · Comply**.

TBC Twin is an AI transformation group. We help companies **transform** how teams work with AI, **build** the agents and harnesses that do real work, and **comply** with AI standards. Then we prove the value with numbers, use by use.

WHAT WE DO

TRANSFORM
AI transformation & adoption
AI Center of Excellence set-up · Team Digital Twin · use cases ranked by value · adoption measured weekly · AI champions, training & certification · ROI engine.

BUILD
Agents, harnesses & automation
AI agents and plugins · trusted search on your own documents · AI + robotic automation + a human check · proof-of-concept to production, on cloud or on-premise GPUs.

COMPLY
AI you can audit
ISO/IEC 42001-ready AI management system: 31 base practices, 9 lifecycle gates, one governance passport per use case · risk control, audit trail, policies.

DEPLOY
Forward Deployed Engineers & AI Solution Architects
Senior builders who sit inside your team, ship with your people, and leave the skills behind.

Package price per outcome, not per hour

HOW WE WORK · 6 STEPS

STEP 1	STEP 2	STEP 3	STEP 4	STEP 5	STEP 6
AUDIT	**BUILD**	**GOVERN & SCALE**	**ROI ENGINE**	**ASSETIZE**	**TECH STACK**
Process gaps & AI fit	Proof-of-concept → production	Governed adoption	Efficiency & leverage	Scale, sell or stop	Reusable AI modules

Team Digital Twin = Σ linked use cases

Use case = Pain × Gain × AI fit

ROI = Savings ÷ Investment

Proof, not promises

From our 2026 transformation programs

36K+
hours of AI time savings logged in one quarter

82%
weekly AI adoption by quarter end

311
live AI use cases, ranked by value

70
AI Transformers trained inside client teams

Team-reported and logged per use. Client names withheld.

DOMAINS

- **Semiconductor & electronics design**
- **Construction & engineering**
- **Legal**
- **Enterprise functions** — HR · Finance · InfoSec · Quality
- **Automotive & aerospace software** — team background
- **Robotics** — team background

TBC Twin

PROOF · PRODUCTS · OFFERS

What clients get from us

Our scorecard

The same eight measures in every program, counted use by use.

ADOPTION — RESULT

82%

of people using AI each week by quarter end

SAVINGS — RESULT

36K+ h

AI time savings logged in one quarter (≈ 900 person-weeks)

USE CASES — RESULT

311

live AI use cases, ranked by Pain × Gain × AI fit

TWIN COVERAGE — RESULT

up to **86%**

of a team's weighted work covered by AI it really uses

SPEED — RESULT

2–5×

faster on core engineering tasks, team-reported

AUTONOMY — HOW WE GRADE

A0 → A4

each use case graded from chat help to an agent that owns the routine

ROI — TARGET

3×

return on build cost: our target, tracked weekly as Savings ÷ Investment

PRODUCTS — RESULT

2 live

AI products we own and run: Qarina.ai and detumble.ai

How we count. One tap in our adoption tool = one AI use. Hours per use are fixed per use case by an AI committee, so numbers add up the same way in every team. Guards catch back-dating, double counting and over-reporting. Results are team-reported from our 2026 programs; client names withheld.

Qarina.ai LEGAL AI — LIVE · REQUEST ACCESS

Arabic legal AI. Deep legal reasoning grounded in Egyptian and Arab law and cases. Every answer is backed by evidence.

detumble.ai CONSTRUCTION AI — LIVE

Drawings in. Quantities, Bill of Quantities, material take-off and a 3D model out.

USE CASES WE DELIVER

SEMICONDUCTOR
Regression-log triage · spec & databook Q&A · RTL coding · lint & warning clean-up · place-and-route tuning · test generation

CONSTRUCTION
Drawings → quantities · 3D model from 2D drawings · material take-off · tender questions (RFIs)

LEGAL
Arabic legal research with evidence · case reasoning · drafting & review

ENTERPRISE
CV screening & headhunting · finance reconciliation · security & compliance tracking · CEO reports

STACKS WE BUILD ON

Anthropic Claude · AWS · NVIDIA · Microsoft Azure · Google Gemini · Cursor · GitHub Copilot · MCP · RAG · RPA

OFFERS · ASK FOR ANY

AI Discovery & Digital Twin — 4–6 weeks
Map every team's work, rank AI use cases, get a roadmap

AI Transformation Program — 2 × 4 months
Your AI Center of Excellence, measured weekly

Agent & Harness Build — proof in weeks
One workflow to production, tested, human-checked

ISO/IEC 42001 Readiness — scoped in 1 call
Gap check vs. 31 practices and 9 gates

Forward Deployed Engineers — monthly
Engineers & AI architects inside your team

Executive AI Session — ½–1 day
"Mastering Harness Engineering" for leaders & builders

WHY TBC TWIN

We count, use by use
One tap = one AI use. Hours fixed per use case, so savings add up the same in every team.

We build, not just advise
Our engineers ship agents and harnesses into production, then hand them over to your people.

Compliant by design
Every use case gets an ISO/IEC 42001 governance passport: 31 base practices, 9 gates.

Let's find your first AI win in 30 minutes.
